

# BOLDORCCHI

ESTABLISHED IN 1909

OIL & GAS APPLICATIONS

WORLDWIDE ENGINEERING EXCELLENCE

## Fan & Blower Packages

Fan packages are critical to your operation. We're experts at engineering and manufacturing fans meeting **API 673** to help increase your capacity and lower your energy consumption.

## Compressors

In-house designed compressors meeting **API 617 & API 672**. Like our fans and blowers, our compressors can be part of an in-house engineered integrated solutions package.

## Air Cooled Heat Exchangers

Boldrocchi has been manufacturing heaters & coolers, mainly according to **API 661**, since 1931. Each one is tailor-made to our customers' specifications. Our tube bundles are mechanically and thermally designed to withstand high pressures (up to 450 bar), and are constructed using special materials such as Super Duplex, Monel, Hastelloy and titanium.

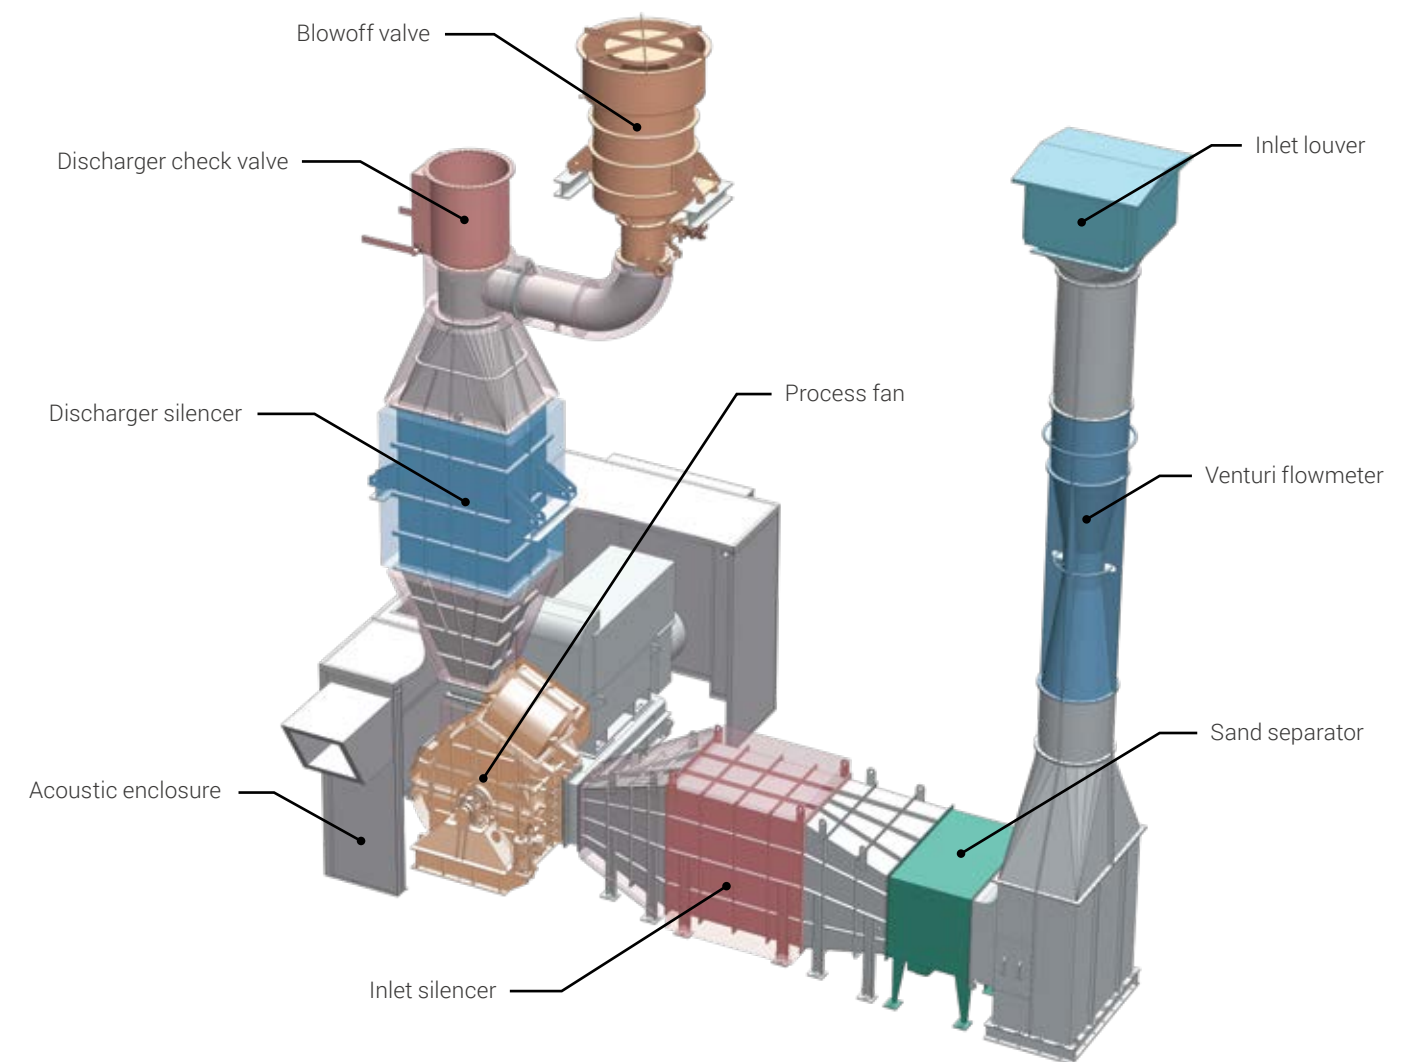

## Dampers

Our highly engineered dampers offer optimal process flexibility: they're designed to withstand the rated plant production, but are also efficient during minimum turndown conditions.

# Boldrocchi's **Integrated Approach**

Complete package systems for the oil & gas industry

Many products. One **solution**.

Boldrocchi excels at providing multiple products in one solution tailored to meet all of your performance needs. From fans to heat exchangers, all the way through to noise protection, we do it all.

Hydrogen

Ethylene

CCR

SRU

We can perform **any test** for oil & gas applications in our facility.

Boldrocchi is one of the few manufacturing and engineering companies in the world to have their own testing facilities. With three in-house testing centers, a wide range of tests are available, including nondestructive testing (NDT), hot gas testing, rotor balancing and performance tests up to 4MW.

Performance tests  
Mechanical running tests  
Complete unit tests  
Overspeed tests  
Pressure tests

We **know** the oil & gas industry.

We are **approved by all main end users / licensors:**
