

STOP WORK POLICY

BOLDROCCHI Company is constantly committed to promoting and consolidating the culture of health and safety of all the people involved in its activity, increasing awareness of risks and promoting responsible behaviors in order to ensure that work is carried out in quality and without accidents because each person who works with us represents the most precious asset to be protected.

We are committed to safeguarding the environment, convinced that preventing risks and promoting responsible behaviors allows us to defend our well-being and that of future generations.

We ask each of you to intervene promptly and stop any activity that could put your own or others' health and safety at risk or that could cause damage to the environment, understood as compromising the quality of its components (air, soil, water, flora and fauna).

We also ask you to immediately report to your direct superior any unsafe behavior and any action, omission or situation that could potentially lead to an accident or environmental damage.

The Stop Work order must be applied without fear of consequences. No blame or liability can be attributed to an employee or contractor who reports in good faith a risk situation that stops operations, even if such action is later found to be unnecessary.

The health and safety of workers and the protection of the environment are our daily commitment and take priority over any other need.

The Management Boldrocchi
